Research papers

Estimation of root zone soil moisture and surface fluxes partitioning using near surface soil moisture measurements
J. Li and S. Islam 1
Calibration of Richards' and convection–dispersion equations to field-scale water flow and solute transport under rainfall conditions
D. Jacques, J. Šimůnek, A. Timmerman and J. Feyen 15
On the use of combined geophysical methods to assess water content and water conductivity of near-surface formations
S. Garambois, P. Sénéchal and H. Perroud 32
Flow of variable-density formation water in deep sloping aquifers: minimizing the error in representation and analysis when using hydraulic-head distributions
S. Bachu and K. Michael 49
Hydrology and hydraulic properties of a bedded evaporite formation
R.L. Beauheim and R.M. Roberts 66
Identification of an urban fractured-rock aquifer dynamics using an evolutionary self-organizing modelling
Y.-S. Hong and M.R. Rosen 89
On downstream hydraulic geometry and optimal energy expenditure: case study of the Ashley and Taieri Rivers
P. Molnar and J.A. Ramirez 105
Response to pumping of wells in sloping fault zone aquifers
F. António and L. Pacheco 116
Downscaling recent streamflow conditions in British Columbia, Canada using ensemble neural network models
A.J. Cannon and P.H. Whitfield 136
The GROWA98 model for water balance analysis in large river basins—the river Elbe case study
R. Kunkel and F. Wendland 152
Potential climate change impacts on flood producing mechanisms in southern British Columbia, Canada using the CGCMA1 simulation results
A. Loukas, L. Vasiliades and N.R. Dalezios 163
Forecasting operational demand for an urban water supply zone
S.L. Zhou, T.A. McMahon, A. Walton and J. Lewis 189
Groundwater discharge from areas with a variable specific drainage resistance
A.A. Van de Griend, J.J. De Vries and E. Seyhan 203
Development and evaluation of a mathematical model for surface-water flow within the Shark River Slough of the Florida Everglades
C.H. Bolster and J.E. Saiers 221
An NMR study of single- and two-phase flow in fault gouge filled fractures
Q. Chen and W. Kinzelbach 236
An alternative IUH for the hydrological lumped models
R. Szymkiewicz 246
Power of the Mann–Kendall and Spearman's rho tests for detecting monotonic trends in hydrological series
S. Yue, P. Pilon and G. Cavadias 254
